

**ENTRY-LEVEL ASSESSMENT
FALL 2012 Cohort
Tracked Through 2013-2014**

ROGERS STATE UNIVERSITY
Claremore, Oklahoma

Prepared by:

The Office of Accountability and Academics
Fall 2014

Entry-Level Assessment For Fall 2012 Cohort Tracked Through 2013 - 2014

Executive Summary

Rogers State University (RSU) analyzes college preparedness of all new students – first-time freshmen as well as transfer students. Students’ scores on the American College Test (ACT) are the primary indicator of academic readiness. Transfer students are evaluated using both ACT scores and prior coursework. Students with low ACT sub-scores or no prior coursework receive secondary testing using the ACT COMPASS. Based on their performance, students identified as at-risk in one or more basic skills areas are enrolled in appropriate developmental studies courses to prepare them for success in college level course work.

Developmental coursework may be required when a first-time freshman has the following score on a subtest of the ACT:

ACT in English below 19
ACT in math below 19
ACT in reading below 19
ACT in science below 19

Students who do not score at or above 19 on each ACT subtest are referred for secondary testing. The ACT COMPASS is the secondary test for English, reading and mathematics, and the Stanford Test of Academic Skills – Science (STASS) is the secondary test for science. With the exception of the STASS test, students who do not pass secondary testing on the first attempt may retake the test one time after a one-week waiting period. Developmental courses must be completed within the first 24 semester hours attempted for first-time freshmen (12 semester hours for transfer students); otherwise, future enrollments by the student will be limited to only the required zero-level courses until successful completion. A grade of “C” or higher is required to clear a developmental course requirement. *Table 1: Curricular Proficiency Model* provides a visual representation of the entry-level assessment plan at Rogers State University.

During fall 2012, 688 academically deficient students accounted for 983 enrollments in courses as follows: Basic Writing (N = 221), Reading I (N = 120), Science Proficiency (N =

40), and Elementary Algebra or Intermediate Algebra (N = 602).¹ Results show that for the fall 2012 cohort, 35% of Basic Writing students successfully completed the course with a C or better. Further, 55% of Reading students, 43% of Beginning Algebra students, 64% of Intermediate Algebra students, and 68% of Science Proficiency students successfully completed their developmental courses with a C or better. In general, these success rates have remained relatively stable over the previous two cohorts with minor fluctuations.

In comparing success rates in MATH 1513 – College Algebra, students whose ACT MATH sub-scores qualified them to enroll directly into college-level math had the highest success rate with a C or better (61%). This surpasses the national average of approximately 50%. Students who placed in Beginning Algebra and successfully completed it had the second highest success rate in College Algebra (53%), outscoring students who placed into Intermediate Algebra (49%), and students whose scores on the ACT were below 19 but whose scores on the COMPASS were high enough to waive developmental math. These results suggest that for students with ACT Math sub-scores below 19, enrollment in Beginning Algebra provides an advantage for success in College Algebra.

Student success rates for ENGL 0003 - Basic Writing evidenced a significant decrease from the fall 2009 cohort (57%) to the fall 2011 cohort (29%). However, student success increased slightly for the fall 2012 cohort (35%). It is significant to note that the success rate for successful developmental English students in ENGL 1113 – Composition I (67%) was almost as high as the success rate for students whose ACT scores qualified them to enroll directly into Composition I (69%). Students whose ACT scores were below 19 but whose Compass scores allowed them to waive Basic Writing had lower success rates in Composition I (54%), and transfer students had the lowest success rate in Composition I (52%).

In order to assess student success as a result of successful completion of developmental Reading, POLS 1113 – American Federal Government, HIST 2483 – American History to 1877, and HIST 2493 – American History Since 1877 were selected. For two of the three courses, POLS 1113 and HIST 2483, students whose ACT scores were sufficient for college level work had the highest success rates. Students whose Compass scores qualified them to waive developmental Reading and students who completed the developmental Reading courses had similar success rates in POLS 1113 and HIST 2483. However, for HIST 2493, students whose Compass scores qualified them to waive developmental Reading outperformed students with ACT READ scores at or above 19, and students who were required to complete developmental Reading were significantly less successful. It is unclear as to the cause of this outcome, and results for the next cohort will be monitored for trending.

Historically, Science Proficiency has been assessed using student success rates in BIOL 1114 – General Biology and BIOL 1144 – General Cellular Biology. At the request of Dean of

¹ Rogers State University. (2012). *Enrollment Report Fall Semester 2012*.
<http://www.rsu.edu/accountability/docs/reports-surveys/EnrollmentReportFall2013.pdf>

the School of Math, Science, and Health Sciences, GEOL 1014 – Earth Science and PHYS 1014 – General Physical Science were added for analysis beginning with the 2014 reporting year. Enrollment in each of these courses for students who enrolled in BIOL 0123 – Science Proficiency was very small, with N = 3 students for each course. Consequently, additional years should be monitored to draw conclusions. It can be concluded that students with ACT Science sub-scores at or above 19 had higher success rates than all other groups, including transfer students.

Interpreting Tables 2 through 6

Success rates in math, English, reading and science are presented in Tables 2, 3, 4 and 5, respectively. To clarify, *Table 2: Success Rates of Math Deficient Students* provides tracking data demonstrating successful or unsuccessful academic performance by student headcount in MATH 0114 - Elementary Algebra and MATH 0213 - Intermediate Algebra. Student achievement for each cohort is tracked over a two-year period, comparing results from the two preceding cohorts, in order to examine student performance beginning with developmental course work through corresponding general education core course work. For comparison, academic performance is reported for students placed directly into MATH 1513 or MATH 1503 based on the ACT, COMPASS and other method (transfer course, etc.).

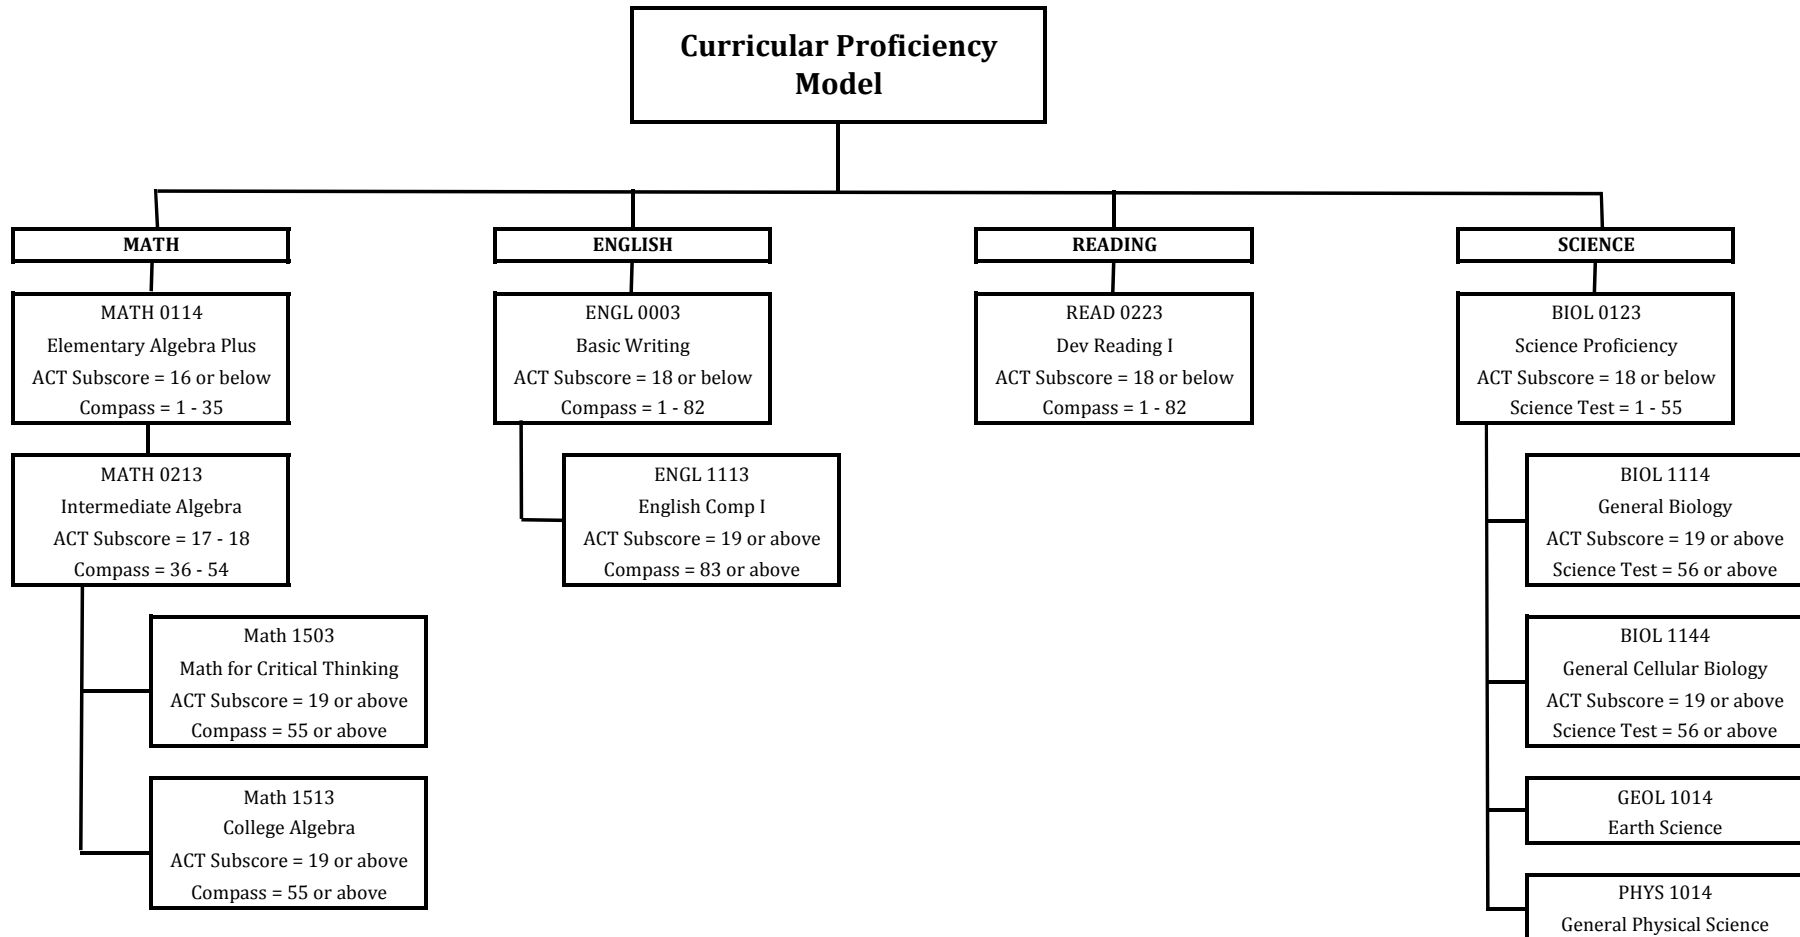

The vertical columns in each box of Tables 2, 3, 4 and 5 represent percentages of successful (S) and unsuccessful (U) student performance. The three columns represent the first-time freshmen cohorts from fall 2010 (left column), 2011 (center column) and 2012 (right column). The headcount (number) of students is found in the parentheses at the bottom of the column. Successful performance is defined as course grades of A, B or C. Unsuccessful performance is defined as D, F, I or W. Withdrawal percentages (W) are also reported separately for planning purposes.

Table 6: Success Rates in Detail amplify the previous tables to provide detailed information about the five most recently tracked cohorts who enrolled in the specified courses for the fall semesters of 2008-2012. For example, 359 students enrolled in MATH 0114 during the fall 2012 semester. Of the 359 students, 155 (43%) earned the grade of A, B or C, which are consider “successful”. Unsuccessful performance, as defined as D, F, W or I, was earned by 204 (57%). Of the successful cohort of 155 students, 117 enrolled in MATH 0213 for the spring 2013 semester. Seventy percent (64%) out of 117 students were successful. Of the 75 students remaining in the successful cohort group, 58 students enrolled MATH 1513 College Algebra during the summer 2013 or fall 2013 semester. In summary, 31 students out of the original cohort of 359 successfully completed MATH 1513. This tracking model does not include students who “stopped out” of the curricular area, e.g., math.

Eight graphs follow Table 6 and were designed to provide additional information for understanding RSU entry-level student success. These graphs are as follows:

- Figure 1: First-time Freshmen Mean ACT Scores for Fall 2008 through Fall 2012 Cohorts
- Figure 2: Composite Fall 2012 First-time Freshmen Remediation Rates
- Figure 3: Fall 2012 First-time Freshmen Areas of Deficiency
- Figure 4: Fall 2012 First-time Freshmen Success Rates by Developmental Area
- Figure 5: Fall 2012 First-time Freshmen Student Success Rates in Mathematics Disaggregated by College Readiness
- Figure 6: Fall 2012 First-time Freshmen Student Success Rates in English Disaggregated by College Readiness
- Figure 7: Fall 2012 First-time Freshmen Student Success Rates in Reading Disaggregated by College Readiness
- Figure 8: Fall 2012 First-time Freshmen Student Success Rates in Science Disaggregated by College Readiness

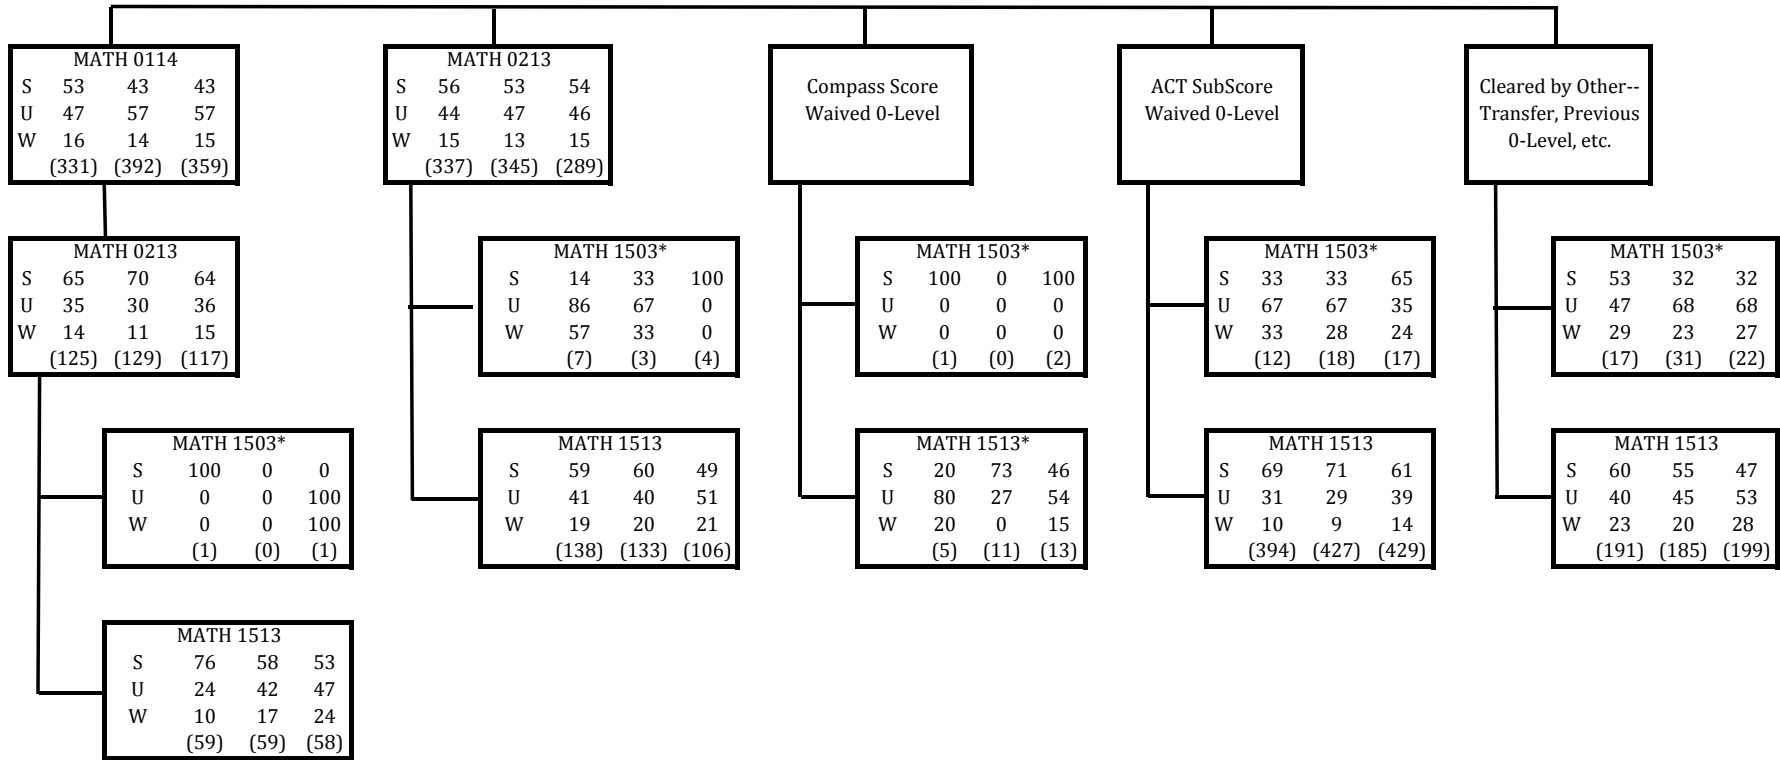

Table 1: Curricular Proficiency Model

- Proficiency established within 24 credit hours or 12 credit hours if transfer.
- Intermediate Algebra is prerequisite for Math 1503, Math 1513, or PHYS 1014.
