General Education Student Learning Report (rev. 7/14)

Fall 2013 - Spring 2014

The Department of Communications in the School of Liberal Arts

Communications, B.A.

Effectively assessing a degree program should address a number of factors:

- 1) Valid student learning outcomes should be clearly articulated;
- 2) Valid assessment measures should be used, consistent with the standards of professional practice;
- 3) There should be evidence that assessment data are being used by faculty to make necessary instructional or assessment changes; and there should be evidence that instructional or assessment changes are being implemented to improve student learning.

Relationship of Degree Program Learning Outcomes to Departmental and University Missions

RSU Mission	General Education Mission
Our mission is to ensure students develop the skills and knowledge required to achieve professional and personal goals in dynamic local and global communities	General Education at Rogers State University provides a broad foundation of intellectual skills, knowledge, and perspectives to enable students across the University to achieve professional and personal goals in a dynamic local or global society.
RSU Commitments	General Education Outcomes
To provide quality associate, baccalaureate, and graduate degree opportunities and educational experiences which foster student excellence in oral and written communications, scientific reasoning, and critical and creative thinking.	 Acquire and evaluate information. Analyze and integrate knowledge. Develop perspectives and an understanding of the human experience. Communicate effectively.
To promote an atmosphere of academic and intellectual freedom and respect for diverse expression in an environment of physical safety that is supportive of teaching and learning.	

RSU Mission	General Education Mission
To provide a general liberal arts education that supports specialized academic programs and prepares students for lifelong learning and service in a diverse society.	 Acquire and evaluate information. Analyze and integrate knowledge. Develop perspectives and an understanding of the human experience. Communicate effectively.
To provide students with a diverse, innovative faculty dedicated to excellence in teaching, scholarly pursuits, and continuous improvement of programs.	
To provide university-wide student services, activities, and resources that complement academic programs.	
To support and strengthen student, faculty, and administrative structures that promote shared governance of the institution.	
To promote and encourage student, faculty, staff, and community interaction in a positive academic climate that creates opportunities for cultural, intellectual, and personal enrichment for the university and the communities it serves.	

PART 1

Discussion of Instructional Changes Resulting from 2012-2013 General Education Student Learning Report

List and discuss all instructional or assessment changes proposed in Part 4 of last year's General Education Student Learning Report, whether implemented or not. Any other changes or assessment activities from last year, but not mentioned in last year's report, should be discussed here as well. Emphasis should be placed on student learning and considerations such as course improvements, the assessment process, and the budget. If no changes were planned or implemented, simply state "No changes were planned or implemented."

Instructional or Assessment Changes	Changes Implemented (Y/N)	Impact of Changes on Degree Program Curriculum or Budget
To address the problem of missed marks on the SPCH 1113 final exams:		These recommendations are being implemented in hopes of improving student learning and meeting performance standards.
a. In order to address low performance for the on-line SPCH 1113, the instructor recommended the following:i. A revision of the online content so that no	Υ	

assignment is more than three clicks away from the homepage.		E-campus is now easier for online speech students to navigate.
ii. A reduction of written content, critical thinking and discussion forum assignments.	N	This suggestion was made by a part-time faculty member. Although the input is appreciated, the faculty decided that online content should match that of the traditional course.
iii. The need to solve "MySpeechKit" login problems.	Y	We alerted Pearson immediately to login problems with MySpeechKit, which was dropped at the end of the year for Pearson's MySearchLab. Meanwhile, students performed better on their final exam compared to the previous academic year.
b. To address the low performance for the blended SPCH 1113 course, the instructor proposed a more stringent final as well as further encouragement for students to do their best in their final exam.		Student learning, as measured by performance on the final exam, improved in 2013-14.
SPCH 1113 faculty proposed assessing students' ability to incorporate scholarly research in their speeches. This will increase the number of outcomes to three.	N	Students are already encouraged to blend primary and secondary sources in their research. As research is integral to effective public speaking, we hold that assessing outcomes 1 and 4 are sufficient.
The Pryor instructor proposed a budget request for a production to be held in Pryor.	N	The budget request in theatre was not approved. The 2013-14 production held in Bartlesville, carved out of the regular theatre budget with some difficulty, proved to be a success. Three Bartlesville students participated as actors and one as a theatre technician. The Bartlesville performances were better attended than the Claremore performances.
		Date # Audience \$ amount of box office and concessions 12-Feb 30 \$74.00 Claremore 13-Feb 35 \$84.00 Claremore 14-Feb 43 \$272.00 Bartlesville 15-Feb 41 \$206.00 Bartlesville Students need opportunities to connect theory to practice, which improves
		student learning. RSU Theatre productions give students exposure to theatrical performances, providing content for their class analysis papers. That said, the Theatre Program budget has been flat for 3 years, and fixed costs have risen. Therefore, the Theatre Program finds itself decreasing the

number of offerings rather than expanding into Pryor. Nor is a Bartlesville production planned in 2014-15.
The state of the s

PART 2

Discussion of the University Assessment Committee's 2012-2013 Peer Review Report

[Complete this part only if the general education course(s) was among those that were peer reviewed last year.] The University Assessment Committee in its General Education Peer Review Report provided feedback and recommendations for improvement in assessment. List or accurately summarize all feedback and recommendations from the committee, and state whether they were implemented or will be implemented at a future date. If they were not or will not be implemented, please explain why. If no changes were recommended last year, simply state "No changes were recommended."

Feedback and Recommended Changes from the University Assessment Committee	Suggestions Implemented (Y/N)	Changes that Were or Will Be Implemented, or Rationale for Changes that Were Not Implemented
N/A		

PART 3

Analysis of Evidence of Student Learning Outcomes

The four General Education Outcomes are listed below. For each outcome, indicate the General Education courses being assessed, and provide a brief narrative of the assessment measures and performance standards used, as well as the sampling methods and sample sizes. For each measure, document the results of the activity measured and draw any relevant conclusions related to <u>strengths and weaknesses of their performance</u>. Finally, indicate whether the performance measure was met or not.

OUTCOME 1: Acquire and evaluate information

At least 80% of the students should score at the 70% on both the informative and persuasive speech assignments which are common to all sections of speech communication.	students enrolled in the speech communication on-ground course in both the fall and	All enrolled students' (489) informative and persuasive speech scores were counted.	in their informative speeches, 86% scored 70% or higher in their of reasons we improvement performance: instructors inc workshop-typ activities gear improving the logic processe more use of d provided by the publishers; imactivities and promote more and changes i		Students continue to exceed the 70% threshold. A variety of reasons were attributed to improvement in student performance: some instructors incorporated more workshop-type writing activities geared towards improving their evidence use, logic processes, and warrants; more use of digital technology provided by the textbook publishers; implementation of activities and lessons to promote more active learning; and changes in lectures and procedures.	Υ

PART 4

Proposed Instructional Changes Based on Conclusions Drawn from Evidence Presented Above

State any proposed instructional or assessment changes to be implemented for the next academic year (2014-2015). They should be based on conclusions reported in Part 3 (above) or on <u>informal activities</u>, such as faculty meetings and discussions, conferences, pilot projects, textbook adoption, new course <u>proposals</u>, <u>curriculum modifications</u>, etc. Explain the rationale for these changes and how they will impact student learning and other considerations, such as curriculum, degree plan, assessment process, or budget. If no changes are planned, simply state "No changes are planned."

General Education Outcomes	Instructional or Assessment Changes	Rationale for Changes	Impact of Planned Changes on Student Learning and Other Considerations.
	Faculty decided to clarify our assessment sampling method. Rather than calculate "all enrolled" students, scoring zeros for students who have stopped attending, we assess only assignments that are attempted.		No effect on learning is expected, however, the clarification will allow more accurate "apples-to-apples" comparisons and simplify data collection.

PART 5

Shared Pedagogical Insight that Improves Student Learning or Classroom Engagement

(OPTIONAL) If your department or a faculty member has developed a method or technique of teaching that seems especially effective in improving student learning or student engagement in the classroom, please provide a brief description below. More detail can be communicated during the face to face peer review session.

PART 6 (A & B)

Documentation of Faculty Participation and Review

A. Provide the names and signatures of all faculty members who contributed to this report and indicate their respective roles.
