Alumni Survey (4-Year) Graphics Report
For
ROGERS STATE UNIVERSITY

Prepared by ACT Survey Research Services
10/05/10

This report contains pie charts & bar graphs for selected items for your college and for the current national normative sample. For all Likert scale items (e.g., 5-point Satisfaction scale), data are displayed for your institution's top and bottom five items as well as the five items with the greatest and least differences for your institution in comparison with national normative data. Please note percentages may not add to 100 due to the effect of rounding.

The "National Norms" used in this report are based on 17,695 student records from 52 postsecondary schools that administered the ACT Alumni Survey (4-Year) between July 1, 2000 and June 30, 2007. Normative data of this type are often referred to as "user norms" because they simply represent a composite of the data obtained by a number of institutions that administered the instrument during a particular period of time. See the "Normative Data Report" for the Alumni Survey (4-Year) for more information concerning the nature of the national norms sample.
