

Welcome Prospective Student:

Thank you for inquiring about the **Associate Degree Nursing Program** at Rogers State University (RSU). This nursing program leads to Registered Nurse licensure and has an excellent reputation in the nursing community.

If you are a first time entering college student, a transfer student, or a re-entering Rogers State University student, the **first step** is to contact the Office of Enrollment management to apply for admission or re-admission. You can apply for admission at any of our three campuses, Markham Hall on the Claremore Campus, Pryor, and Bartlesville. It is important to bring your scholastic records with you, which include:

- High school transcript with graduation date or GED
- ACT or SAT scores
- Other college or university transcripts

For additional information on the application process to Rogers State University, please contact the Office of Enrollment Management at 918-343-7546.

After admission to the University, the **next step** is to contact Brandi Mulanax, Advisor & Retention Specialist for pre-nursing students in the School of Professional Studies. She can be reached by phone at 918-343-8345, by email at bmulanax@rsu.edu, or in person in the Harrington Hall, Rm 166. Brandi can advise you on the coursework required for the program.

Graduates from the RSU nursing program are prepared to take the licensing exam to practice as a Registered Nurse. The Oklahoma Nurse Practice Act has specific rules concerning eligibility to take the licensing exam. Candidates for licensure must submit to the Oklahoma Board of Nursing "certified written evidence" of no criminal *convictions* in the United States within the past five years. Please consult the enclosed flyer for further information.

We appreciate your inquiry into the RSU nursing program. The faculty and staff are here to help you obtain your educational goals! If you have any questions or need additional information, please feel free to call Colleen Wilson at 918-343-8345 or the Health Sciences Office at 918-343-7635.

Again, thank you for your interest and we look forward to hearing from you!

Respectfully,

Lynn Korvick, PhD, MS, RN, CNE
Associate Professor
Department Head, Health Sciences
