Graduation Survey

The Graduation Survey was available online to all students who received a degree during the 2008-2009 year. These included graduates of the Summer 2008, Fall 2008, and Spring 2009 semesters excluding graduates who attended the 2008 Commencement. The graduates who attended the 2008 Commencement participated in the May 2008 Graduation Survey. Letters were sent to eligible graduates on April 14, 2009. Reminder emails were sent April 22, 2009, and May 5, 2009. Of the 424 eligible graduates contacted, 148 graduates participated in the online survey, a 35% response rate.

With the implementation of the online survey, several questions were added while existing questions were edited. Five of the questions from the previous survey were removed.

The results of the Graduation Survey suggest that most students are satisfied with their experience at RSU especially with the quality of instruction. A limited number of demographic questions were asked. The results indicate that 77% of the students were taking classes on the Claremore campus and 42% were employed either in their major field or a closely related field. Additionally, 76% of the Associate in Applied Science students were Nursing majors, 19% of the Associate in Arts or Science were Business Administration majors, 17% of the Associate in Arts or Science were Liberal Arts majors, and 27% of the Bachelor degree seeking had majors in Business Administration. Of the 148 participants, 72% received a baccalaureate degree, 43% received an Associate in Arts or Science degree, and 17% received an Associate in Applied Science degree. Some of the graduates received more than one degree; therefore, the percentages do not add up to 100%.

Survey responses suggest that 85% of graduates believe RSU meets the needs of Northeast Oklahoma and its students. Additionally, RSU helps them meet their educational goals, helps them apply what they learn to their current experiences, and enables them to make better life and career decisions. Almost 90% of graduates indicated the RSU faculty show a high degree of interest in student learning.

Comparing the May 2009 Graduation Survey to the survey of May 2008, RSU has shown a 1.67% decrease in the average overall graduate approval. One of the increases was found in RSU's ability to meet the educational needs of its students. Overall, RSU met the benchmark in most areas.

RSU set a benchmark of 85% for the May 2009 Graduation Survey. This benchmark was met in most areas. Topic areas below 85% are:

- Greater appreciation of diversity
- Faculty availability during office hours
- Faculty teaching general education courses demonstrated concern for progress
- Availability of faculty/academic advisor
- Faculty/academic advisor guided toward educational and career goals.
- Smaller course sizes increased my ability to learn.
- Scheduling classes to meet needs of students
- Course descriptions in the Bulletin adequately described the course
- Career Placement Service
- Student life experiences

Table 1 presents the Graduation Survey Trend by Topic and Question comparing May 2008 to May 2009 and showing the three (3) year increase/decrease using May 2007 and May 2009. Chart 1 presents a graphical illustration of the Graduation Survey Trend by Topic and Question. As can be seen in this chart, most students agreed or strongly agreed with questions concerning General Instruction, Faculty/Advisor, Courses, and Satisfaction. Table 2 presents a cumulative frequency distribution for the May 2009 Graduation Survey. Appendix A is a collection of graduation survey reports based on the degrees as indicated by the students.
