

# Degree Program Student Learning Report

Revised August 2017

## Select Academic Department

# AA in Criminal Justice Studies

For 2016-2017 Academic Year

### PART 1

#### Degree Program Mission and Student Learning Outcomes

A. State the school, department, and degree program missions.

University Mission	School Mission	Department Mission	Degree Program Mission
Our mission is to ensure students develop the skills and knowledge required to achieve professional and personal goals in dynamic local and global communities.	<p>The mission of the School of Professional Studies (SPS) to develop students' skills and knowledge so they can successfully perform in their professional career of choice, and to prepare them to be lifelong learners in a diverse society. This is accomplished in a positive academic climate which is supported by academic and intellectual freedom, and faculty who are dedicated to a quality educational experience.</p> <p>Curricula for the associate, bachelors and graduate degrees are developed by expert faculty who are dedicated to an excellence in teaching, research and university service. The programs in the SPS are dynamic,</p>	The mission of the Department of Technology and Justice Studies is to support the SPS and RSU in their mission to prepare students to achieve professional and personal goals in dynamic local and global communities.	The Associate in Arts in Criminal Justice Studies degree has been designed for individuals seeking a career in one of the components of the criminal justice system such as law enforcement, prosecution, or corrections. Hence, this degree has been structured to prepare criminal justice professionals to operate effectively within today's legal environment balancing individual rights with the protection of society, interacting with a culturally diverse community, and protecting the public from increasingly complex threats.

University Mission	School Mission	Department Mission	Degree Program Mission
	and foster student achievement of their personal and professional goals reflective of their field of study. Innovative teaching strategies are used across diverse educational platforms to facilitate student learning outcomes.		

**B. Align school purposes, department purposes, and program student learning outcomes with their appropriate University commitments.**

University Commitments	School Purposes	Department Purposes	Student Learning Outcomes
To provide quality associate, baccalaureate, and graduate degree opportunities and educational experiences which foster student excellence in oral and written communications, scientific reasoning and critical and creative thinking.	The SPS provides this support by providing two-year and four-year educational opportunities in business, sport management, technology, justice studies, nursing, and emergency medical services..	To provide the technology course support for the AS in Computer Science and AAS in Applied Technology degrees as well as BS in Business Information Technology, BS in Game Development, and BT in Applied Technology, AS in Criminal Justice Studies, and the BS in Justice Administration.	Students completing the Associate in Arts in Criminal Justice Studies degree program will demonstrate a written and oral ability to think critically and creatively.
To promote an atmosphere of academic and intellectual freedom and respect for diverse expression in an environment of physical safety that is supportive of teaching and learning.	The associate and baccalaureate degrees are taught using a large array of innovative methods, including regular classes, online courses, and compressed video.		
To provide a general liberal arts education that supports specialized academic programs and prepares students for lifelong learning and service in a diverse society.	The SPS accomplishes its mission through traditional and innovative learning opportunities including one graduate program, nine bachelor’s programs and seven associate degrees.		Students completing the AA: CJS will demonstrate proficiency in understanding and applying relevant criminal justice concepts.

University Commitments	School Purposes	Department Purposes	Student Learning Outcomes
To provide students with a diverse, innovative faculty dedicated to excellence in teaching, scholarly pursuits and continuous improvement of programs.	The baccalaureate degrees are taught using a large array of innovative methods.		
To provide university-wide student services, activities and resources that complement academic programs.			
To support and strengthen student, faculty and administrative structures that promote shared governance of the institution.			
To promote and encourage student, faculty, staff and community interaction in a positive academic climate that creates opportunities for cultural, intellectual and personal enrichment for the University and the communities it serves.			

## PART 2

### Revisit Proposed Changes Made in Previous Assessment Cycle

Revisit each instructional/assessment change proposed in Part 5 of the degree program SLR for the preceding year. Indicate whether the proposed change was implemented and comment accordingly. Any changes the department implemented for this academic year, but which were not specifically proposed in the preceding report, should also be reported and discussed here. Please note if no changes were either proposed or implemented or this academic year.

Proposed Change	Implemented? (Y/N)	Comments

### PART 3

#### Response to University Assessment Committee Peer Review

The University Assessment Committee provides written feedback on departmental assessment plans through a regular peer review process. This faculty-led oversight is integral to RSU's commitment to the continuous improvement of student learning and institutional effectiveness. UAC recommendations are not compulsory and departments may implement them at their discretion. Nevertheless, respond below to each UAC recommendations from last year's peer review report. Indicate whether the recommendation was implemented and comment accordingly. Please indicate either if the UAC had no recommendations or if the program was not subject to review in the previous cycle.

Peer Review Feedback	Implemented (Y/N)	Comments

### PART 4

#### Evidence of Student Learning

A. Student Learning Outcome					
SLO #1: Students completing the Associate in Arts in Criminal Justice Studies degree program will demonstrate a written and oral ability to think critically and creatively					
B. Assessment Measure	C. Performance Standard	D. Sampling Method	E. Sample Size (n)	F. Results	G. Standard Met (Y/N)
Students completing the Associates in Arts in Criminal Justice Studies degree program will demonstrate a written and oral ability to think	Written and oral presentations given in <b>CJ 1113-- Introduction to Criminal Justice and CJ 2343 –Community Relations</b> will demonstrate proficiency (≥ 70%) in applying	No sampling method applied: <b>All CJ 1113 Introduction to Criminal Justice and CJ 2343 Introduction to Corrections</b> will complete the written	CJ 1113 (N)=60	CJ 1113 ≥ 90% 25/60=41% 80-89% 21/60=35% 70-79% 9/60=15% 60-69% 2/60=3% < 60% 4/60=6%	Y

critically and creatively.	relevant legal and criminal justice concepts.	paper and presentation.	CJ 2343 (N)=29	≥ 90% 2/29=41% 80-89% 10/29=34% 70-79% 5/29=17% 60-69% 1/29=4% < 60% 1/29=4%	Y
----------------------------	---	-------------------------	----------------	--	---

**H.  
Conclusions**

The AACJS students exceed the proficiency standard that 80% of the students will score ≥ 70%. CJ 1113 represents the combined scores of two fall classes and one spring class, 91% of 60 students scored ≥70%. CJ 2343 represents the spring class (data was not collected for the fall class), 92% of 29 students scored ≥70%. The graded assignment was the third writing assignment and second presentation in each class, providing the students opportunity to improve with feedback from the earlier assignments.

Evidence and analyze student progress for each of the student learning outcomes (same as listed in Part I B above) for the degree program. See the *Appendix* for a detailed description of each component. Note: The table below is for the first program learning outcome. Copy the table and insert it below for each additional outcome. SLO numbers should be updated accordingly.

<b>A. Student Learning Outcome</b>					
SLO #2: Students completing the AA:CJS will demonstrate their proficiency in understanding and applying relevant legal and criminal justice concepts.					
<b>B. Assessment Measure</b>	<b>C. Performance Standard</b>	<b>D. Sampling Method</b>	<b>E. Sample Size (n)</b>	<b>F. Results</b>	<b>G. Standard Met (Y/N)</b>
1. Pretest and Posttest Examination	80% of the AACJS students completing <b>CJ 1113-</b>	No sampling applied: all AACJS CJ 1113 Introduction to Criminal Justice and CJ 1213 Introduction	CJ 1113 (N)=62	CJ 1113 Pretest ≥ 90% 0/62=0% 80-89% 9/62=15% 70-79% 23/62=37%

Option who take the CLEET exam will be measured.</p>	<p>CJ 1113 (N)=56</p> <p>CJ 1213 (N)=26</p> <p>CJ 1213 (N)=24</p> <p>Total (N)=6</p>	<p>60-69% 21/62=34% &lt;60% 9/62= 14%</p> <p>CJ 1113 Posttest ≥ 90% 8/56=14% 80-89% 24/56=43% 70-79% 16/56=29% 60-69% 8/56=14% &lt;60% 0/56=0%</p> <p>CJ 1213 Pretest ≥ 90% 1/26=4% 80-89% 10/26=38% 70-79% 9/26=35% 60-69% 4/26=15% &lt; 60% 2/26=8%</p> <p>CJ 1213 Posttest ≥ 90% 3/24=12% 80-89% 11/24=46% 70-79% 7/24=29% 60-69% 3/24=12% &lt; 60% 0/24=0%</p> <p>The 6 students who graduated the 2015-2016 school year who took the test passed resulting in a 100% pass rate.</p>	<p>Y</p> <p>Y</p>
---	---	---	--	--	-------------------

## H. Conclusions

All students in CJ 1113 Introduction to Criminal Justice and CJ 1213 Introduction to Corrections took a pretest the first or second day of class, and a posttest at the end of the semester. CJ 1113 pretest: 52% of students scored at or above 70%. The posttest resulted in improved performance with 86% of students scoring 70% or above.

CJ 1213 pretest: 77% of students scored at or above 70%. The posttest resulted in improved performance with 87% of the students scoring at or above 70%.

At the time of this report, six students graduating the 2015-2016 school year took the CLEET Peace Officer Certification Exam during the 2016-2017 school year (Council on Law Enforcement Education and Training). All six students passed the CLEET Exam with a minimum of 80% proficiency, and qualify to be certified as Peace Officers in the State of Oklahoma. They will be eligible for employment with Oklahoma law enforcement agencies. The students graduating from the 2016 -2017 school year will take the CLEET Exam in September 2017. The C.O.P. option students continue to be very successful passing the CLEET certification exam and becoming eligible to be employed in the major field of study.

## PART 5

### Proposed Instructional or Assessment Changes

Learning outcomes assessment can generate actionable evidence of student performance that can be used to improve student success and institutional effectiveness. Knowledge of student strengths and weakness gained through assessment can inform faculty efforts to improve course instruction and program curriculum. Below discuss potential changes the department is considering which are aimed at improving student learning or the assessment process. Indicate which student learning outcome(s) will be affected and provide a rationale for each proposed change. These proposals will be revisited in next assessment cycle.

Proposed Change	Applicable Learning Outcomes	Rationale and Impact

## PART 6

### Summary of Assessment Measures

- A. How many different assessment measures were used? 3 measures were used.
- B. List the direct measures (see appendix): Pretest-Posttest, written and oral presentation, and CLEET certification exam.
- C. List the indirect measures (see appendix):

**PART 7**  
**Faculty Participation and Signatures**

**A.** Provide the names and signatures of all full time and adjunct faculty who contributed to this report.

Faculty Name	Assessment Role	Signature
Rob Turner	Prepared the AA CJS SLR	
Dr. Diana Clayton	Reviewed the AA CJS SLR	

**B.** Reviewed by:

Titles	Name	Signature	Date
Department Head	Dr. Roy Gardner		
Dean	Dr. Susan Willis		

## Appendix

### Student Learning Outcome

Student learning outcomes are the observable or measurable results that are expected of a student following a learning experience. Learning outcomes may address knowledge, skills, attitudes, or values that provide evidence that learning has occurred. They can apply to a specific course, a program of study, or an institution. Outcomes should be worded in language that clearly implies a measurable behavior or quality of student work. Outcomes should also include Bloom's action verbs appropriate to the skill level of learning expected of students.

#### Examples:

*Students will be able to apply principles of evidence-based medicine to determine clinical diagnoses and implement acceptable treatment modalities.*

*Students will be able to articulate cultural and socioeconomic differences and the significance of these differences for instructional planning.*

### Assessment Measure

An assessment measure is a tool or instrument used to gather evidence of student progress toward an established learning outcome. Every program learning outcome should have at least one appropriate assessment measure. Learning outcomes are frequently complex, however, and may require multiple measures to accurately assess student performance. Assessment plans should try to incorporate a combination of direct and indirect assessment measures. Direct provide concrete evidence of whether a student has command of a specific subject or content area, can perform a certain task, exhibits a particular skill, demonstrates a certain quality in their work, or holds a particular value. Because direct measures tap into actual student learning, it is often viewed as the preferred measure type. Indirect measures assess opinions or thoughts about the extent of a student's knowledge, skills, or attitudes. They reveal characteristics associated with learning, but they only imply that learning has occurred. Both types of measures can provide useful insight into student learning and experiences in a program. Each also has unique advantages and disadvantages in terms of the type of data and information it can provide. Examples of common direct and indirect measures are listed below.

#### Direct Measures

- Comprehensive exams
- Class assignments
- Juried review of performances and exhibitions
- Internship or clinical evaluations
- Portfolio evaluation
- Pre/post exams
- Third-party exams such as field tests, certification exams, or licensure exams
- Senior thesis or capstone projects

#### Indirect Measures

- Graduate exit interviews
- Focus group responses
- Job placement statistics
- Graduate school placement statistics
- Graduation and retention rates
- Student and alumni surveys that assess perceptions of the program
- Employer surveys that assess perceptions of graduates
- Honors and awards earned by students and alumni.

## **Performance Standard**

A performance standard is a clearly-defined benchmark that establishes the minimally-acceptable level of performance expected of students for a particular measure.

### Examples:

*At least 70% of students will score 70% or higher on a comprehensive final exam.*

*At least 75% of students will earn score a "Proficient" or higher rating on the Communicate Effectively rubric.*

## **Sampling Method**

Sampling method describes the methodology used for selecting the students that were assessed for a given measure. In some cases, such as most course-embedded measures, it is possible to assess all active enrolled students. In other cases, however, it is not feasible to measure the population of all potential students. In these cases, it is important that a well-designed sampling scheme be used to ensure the sample of students measured is an unbiased representation of the overall population. Where multiple instructors teach a particular course, care should be taken to assess students across all instructors, including adjuncts.

### Examples:

*All students enrolled in BIOL 4801 Biology Research Methods II*

*All majors graduating in the 2016-17 academic year.*

## **Sample Size**

Sample size is the number of students from which evidence of student learning was obtained for a given assessment measure.

## **Results**

Results are an analytical summary of the findings arising from the assessment of student performance for a particular assessment measure. Typical presentation includes descriptive statistics (mean, median, range) and score frequency distributions.

## **Standard Met?**

This is a simple yes/no response that indicates whether the observed level of student performance for a particular measure meets or exceeds the established standard. An N/A may be used where circumstances prevented the department from accurately assessing a measure.

## **Conclusion**

The conclusion is a reflective summary and determination of the assessment results obtained for a specific learning outcome. Questions to consider in this section include the following:

- Does the assessment evidence indicate the learning outcome is being satisfactorily met?
- Where multiple measures are used for a single outcome, do the results present a consistent or contradictory pattern?
- What are the most valuable insights gained from the assessment results?
- What strengths and weaknesses in student learning do the results indicate?
- What implications are there for enhancing teaching and learning?
- How can the assessment process be improved?
