

Vaccine Requirements for Enrollment at Rogers State University

In order to comply with the immunization requirements stated in Oklahoma state law (Oklahoma statute, Title 70§3244), freshmen and transfer students that enroll must show documentation of the following immunizations:

- 2 MMR (Measles, Mumps and Rubella) or documentation of immunity with titer
- 3 Hepatitis B vaccines or documentation of immunity with titer

The law permits that when the vaccine is medically contraindicated and a licensed physician has signed a written statement to that effect, such students shall be exempt from the immunization. Further, the law permits a student, or if the student is a minor, the student's parent or legal guardian, to sign a written waiver stating that the administration of the vaccine conflicts with the student's moral or religious tenets. *Please note if you are an on-line student only, you are exempt from this requirement.

The waiver can be accessed on-line by going to the forms link on the Student Health Center web site.

Both vaccines are provided in the Rogers State University Student Health Center.

The Hepatitis B vaccine is available at the Rogers State University Student Health. The Hepatitis vaccine is a series of three shots, the initial injection, the second injection to be given one month from the first and the third injection to be given four months from the first.

You may enroll as soon as you receive the first injection and a hold will not be placed on your account until you are late on the subsequent injections.

If you have any questions, please call 918-343-7614.
