Office of Academic Affairs
Supporting Documentation for
General Education Course Removal

Responses to the following questions should accompany *OSRHE Request for Program Modification (7) Program Requirement Change* form **when proposing that a course should no longer fulfill a General Education requirement**. Place this form at the end of the proposal.

1. Cite the current course prefix, number, name, *Bulletin* course description and prerequisites (if any). Include the statement, "Laboratory Required", "Field Experience Required" or "Permission Required" if applicable.

2. Which General Education requirement does this course currently fulfill?

3. Why is this course no longer appropriate for this General Education requirement?

4. Will the course continue to be offered even if it is not General Education? Either way, how will the removal impact other considerations—course rotations, staffing, etc.?

5. Should a different course fulfill this General Education requirement (either a new course or an existing course that does not currently fulfill this requirement)? Why or why not?

6. Which General Education Learning Outcomes does this course currently serve?
